SUMMARY

B.S. Software Engineering student at Milwaukee School of Engineering with hands-on experience building full-stack and AI-powered applications end-to-end – from architecture through deployment. Recent work includes a Claude API-integrated AI assistant, a full-stack resume-analysis tool, and Java-based developer tooling. Proficient in Java, Python, JavaScript/TypeScript, and React, with practical Agile and CI/CD experience.

EDUCATION

B.S. Software Engineering | Milwaukee School of Engineering | Expected May 2027

PROJECT EXPERIENCE

Voice-Controlled Personal AI Assistant (In Progress)

- Built a voice-controlled AI assistant on the **Claude API** with persistent long-term memory and short-term session history, enabling continuous, context-aware conversations
- Engineered **tool-use capabilities** for autonomous file management, shell command execution, and third-party service integration, delivered through a lightweight, draggable widget interface
- Currently extending functionality to include email integration, **real-time web search**, and automated daily briefings

AI Resume Analyzer

- Built a full-stack resume-feedback web app with **React Router v7** and TypeScript, using **Puter.js** as a serverless backend for auth, file storage, and a key-value store
- Converted uploaded resume PDFs to images and used **Claude** to return an **ATS score** plus four scored feedback categories with actionable tips
- Built a dashboard to track past submissions and scores; deployed live on **Vercel** with a Docker build available for containerized hosting

RevEng UML Diagramming Tool

- Developed a **Java/Swing** desktop app using **ANTLR** to analyze Java projects and visualize UML class diagrams, with class filtering and customizable styling
- Collaborated in an Agile team with sprints and reviews, and maintained a **GitLab CI pipeline** for builds and tests

macOS-Inspired Portfolio Website

- Built a **React** app simulating a macOS desktop, with a draggable Dock, **GSAP**-animated windows, a Finder-style project explorer, and global UI state via Zustand
- Styled a fully responsive UI with **Tailwind CSS** and built the app with Vite for fast development and optimized production builds

TECHNICAL SKILLS

▪ Java ▪ Python ▪ C/C++ ▪ JavaScript/TypeScript ▪ React ▪ Node.js ▪ Tailwind CSS ▪ SQL/SQLite ▪ Git/GitHub ▪ Claude/LLM API Integration ▪ Data Structures & Algorithms ▪ Agile (Scrum) ▪ CI/CD

WORK EXPERIENCE

Team Member, Chick-fil-A | Jul 2022 – Present

- Deliver efficient guest service in front- and back-of-house roles in a high-volume environment
- Mentor new team members on customer engagement, food safety, and shift responsibilities
- Support team leads during peak hours, ensuring smooth operations and consistent quality
